

Economic History of Scotland

Adam Smith, who has towered over economics for more than two hundred years, was not alone in Scotland in creating systems of analysis which would explain how economies function and prosper. Writers of various backgrounds – there being no such profession as 'economist' – who were inspired by issues of the day as well as by the writings of Smith and other Scots, made significant contributions to the development of economic theory and policy that are often overlooked today.

In the Shadow of Adam Smith, a landmark work in the history of economic thought, surveys and integrates the ideas of eighty Scottish writers from the 18th and 19th centuries to reveal a startlingly rich tapestry of argument and debate on a wide variety of economic subjects, both philosophical and practical, that remain highly pertinent today. Government debt, economic growth, banking, credit, taxation – all were tackled by this remarkable, diverse collection of writers. Through reading their contributions to economics we both understand modern economic issues and thought more deeply, and gain a richer understanding of Adam Smith's thought and inheritance.

Written in a crisp and readable style with a minimum of technical detail, this is an ideal book for students of the history of economics, as well as academics and general readers.

Donald Rutherford is in the School of Economics at The University of Edinburgh, where he has taught the history of economic thought for many years.

'Rutherford argues and demonstrates in magnificent detail that Adam Smith was not the only notable Scottish economist of the eighteenth and nineteenth centuries. He was preceded and followed by an impressive group of Scottish men of letters whose writings are vividly described and fairly appraised in this book.'

Andrea Maneschi, Professor of Economics, Vanderbilt University, USA

'This volume sets out an impressive thematic account of the remarkable range of contributors, and contributions to, economic theory and policy in Scotland from 1700 to 1900.'

Sheila Dow, Emeritus Professor, University of Stirling, UK

'Rutherford's groundbreaking account of the history of Scottish economics is the first of its kind and shows the richness of Adam Smith's achievement, as well as the complexity of his inheritance.'

Lars Magnusson, Professor in Economic History, Uppsala University, Sweden

'As a first comprehensive survey of the unique tradition of economics in Scotland covering two hundred years and eighty figures, this is the book that has been wanted by many and has now been written by Rutherford.'

Tatsuya Sakamoto, Professor of History of Social and Economic Thought, Keio University, Japan
